DETAILED ACTION

Drawings

The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

Specification

The disclosure is objected to because of the following informalities: numerous pages of

the specification have garbled information. These pages are 3, 4, 5, 11, 12 and 13.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 57-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite

for failing to particularly point out and distinctly claim the subject matter which applicant regards

as the invention.

Claim 57 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationship between the heating means and the detector. The disclosure cites the myocytes may be heated by electrical means delivered via a catheter or the myocytes may be indirectly heated by radio frequency or ultrasound. The structure of the device is not adequately cited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 57, 62 and 63 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent 5,609,157 to Panescu et al. Panescu discloses a device for treating atrial fibrillation

(Col. 3, line 3) that includes electrodes for detecting electrical events in myocardial tissue (Col.

5, lines 57-60) and an ablation electrode (Col. 7, lines 22-24). Incorporated by reference U.S.

Patent 5,582,609 teaches controlling ablation using temperature feedback providing the

capability to control the temperature to the required range. The detecting electrodes also are

capable of monitoring removal of an atrial myocyte by lack of electrical activity.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Henry M Johnson, III whose telephone number is (703) 305-0910. The examiner can normally be reached on Monday through Friday from 6:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C Dvorak can be reached on (703) 308-0994. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
